

AirStream[™]

Perforated PVC Insect Barrier 

The new AirStream perforated PVC insect barrier is a completely unique and innovative product - unlike anything currently available. It provides all the features of Aleco[®] strip doors while providing the additional benefit of allowing fresh air to circulate while keeping unwanted flying insects out!

Features:

- Allows fresh air in -- keeps unwanted pests out
- Tough enough for forklift traffic
- Helps keep facility cooler longer
- Helps meet FDA requirements
- Improves building appearance
- Available in clear and amber color
- Amber color significantly reduces heat from sun while allowing light and air in

easiest install

Specifications:

- Available in standard temperature formula only
- Indoor/outdoor use
- Holes measure 3/16" diameter
- 8" x .080 thick for personnel and interior doors
- 12" x .120 thick for docks and exterior openings
- Complete door kits, bulk rolls, and replacement strips available

Allows air ventilation, and keeps flying insects out of your work area.

**Also Available in
Amber Color**

Most flying insects perceive the amber color as black and opaque and will not try to enter the area.

"Ventilation Without Aggravation"
